Additional information

about me

I consider myself a creative person with good problem-solving skills and planning and organization skills. I am reliable, I like to work in a team and learn from different points of view.

Likewise, I like to work for objectives aimed at generating good results, with the ability to manage the required times.

Andrea Margarita Mendoza Tec

[Mérida, Yucatán]

Profile

Every day I'm looking for the new technologies in order to expand my knowledge and currently studying software engineering. I'm mainly interested in application development and artificial intelligence. I'm learning new programming paradigms and with it, new languages to expand my skills as a programmer.

Objectives.

- Form a bond of trust with the people around me throughout the race.
- Learn a lot from the professionals who teach at the faculty.
- Graduate in a timely manner.
- Have a well-paid job.
- Achieve my personal goals.

Education.

I studied at the Preparatory School One, Autonomous University of Yucatan.

I finished my studies in June 2021.

One of my accomplishments was participating in the science fair and history Olympiad.

Since 2021

Software engineering

Faculty of mathematics, UADY.
